

SOLATUBE[®]
DAYLIGHTING SYSTEMS

Low profile daylight collector.

The new Solatube 35 cm Ø low profile roof daylight collector option replaces the roof dome and has the subtle appearance of a traditional skylight.

This attractive option is available for the 35 cm Ø pitched roof system, has integral Raybender technology to capture low-angle daylight and is designed to;

- maximise light capture;
- block UV radiation;
- increase insulation values.
